- Put a star next to any that you actually want to do. When will you get started? Put a date next to any actions you want to take so you can start making it real.
- Think of all of the steps will you need to take in order to take that action? ex) If your action is to call your legislators, you may need to research their phone numbers. If your action is to pass out flyers, you will need to order the flyers.
- Put these actions into your calendar to schedule them and turn them from ideas into concrete actions you will be taking.

STEP 5: Keep going. Changing the world will take a while. As you move forward on your change-making path, write down the knowledge, skills, confidence, and community that you want to develop to set yourself up for success in your efforts.

CHANGEMAKER QUADRANT

Knowledge:	Skills:
Confidence:	Community:
